Chirag Shukla

Mumbai, India | +91 9819070342 | chiragshukla236@gmail.com | linkedin.com/in/chirag-shukla24 | github.com/Chiro214 | chirag-shukla236.netlify.app

PROFESSIONAL SUMMARY

Full Stack Developer with 2+ years of experience building production-grade systems across government healthcare infrastructure, enterprise SaaS, and AI-powered automation. Strong in React/Next.js, Python (Django/FastAPI), and PostgreSQL, with hands-on experience integrating AI APIs (OpenAI, Claude, Gemini) and using AI-assisted development tools (Claude Code, Cursor, GitHub Copilot) in daily workflow. Comfortable owning features end-to-end — from API design through deployment.

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, Go, Java, C++, SQL, Rust, PHP
Frontend: React.js, Next.js, Vue.js, HTML5, CSS3, Tailwind CSS, Redux, Vite.js
Backend: Node.js, Express.js, Django / DRF, FastAPI, REST API Design (500+ APIs), GraphQL
Databases: PostgreSQL, MS SQL Server, MySQL, MongoDB, Redis, Supabase, SQLite
AI / ML: OpenAI API, Claude API, Google Gemini API, AWS Bedrock, Groq, Prompt Engineering, RAG Pipelines
AI Dev Tools: Claude Code, GitHub Copilot, Cursor, ChatGPT, ReplitAI
Cloud & DevOps: AWS, GCP, Docker, Kubernetes (GKE), GitHub Actions, CI/CD
Other: Git/GitHub, System Design, OOP, Data Structures & Algorithms, Agile/Scrum, Power BI, Tableau

EXPERIENCE

Assistant System Engineer Aug 2025 – Present
Oxygen Consulting Services Pvt. Ltd. — Pune, India · Remote

- Contributing to ABDM (Ayushman Bharat Digital Mission) integration for healthcare clients — implementing PHR workflows, patient health ID creation, consent management APIs, and NHA-compliant health data exchange pipelines under the Government of India's national digital health mission.
- Conducting compliance audits and generating structured regulatory reports for hospital systems integrating with ABDM, ensuring adherence to National Health Authority guidelines and data privacy mandates.
- Designing and implementing full-stack cloud-native solutions for enterprise client projects with a focus on scalable backend services, system integration, and CI/CD pipeline optimization.
- Acted as sole developer on an internal Audit Management Platform (NestJS, React, PostgreSQL, Playwright) covering automated and manual audit execution, credential vaulting, defect ticketing, and real-time chat.

Data Scientist Jul 2025 – Sep 2025
Coreline Solutions — Pune, India · Remote

- Transformed complex, unstructured datasets into actionable business insights using Python (Pandas, NumPy, Scikit-learn) and SQL.
- Delivered interactive data visualizations and stakeholder reports communicating model outcomes and measurable business impact.

Data Analyst (Virtual Internship) Apr 2023 – Jul 2023
Accenture — New York, USA · Remote

- Built Tableau and Power BI dashboards for client-facing projects; received team commendation for visually engaging dashboards that measurably improved stakeholder communication efficiency.

Associate, Account Management May 2022 – Apr 2023
Remitly — Navi Mumbai, India · Remote

- Managed customer accounts and financial data operations; compiled performance metric reports presented to senior management.

PROJECTS

ApplyAI — AI Job Application Automation SaaS 2026
Next.js · Python · Groq LLaMA · Supabase · Playwright · Google Apps Script

- Founded and built a multi-tenant SaaS platform that scrapes 500+ jobs daily across LinkedIn, Wellfound, Remotive, and WeWorkRemotely, evaluates each against a user's profile using LLaMA 3 via Groq, and generates personalized outreach emails.
- Built the full pipeline: AI fit scoring (0–100), resume tailoring per JD, hiring-manager email discovery, automated follow-up sequencing, and application velocity scoring.

Enterprise CMS & Android APK Ecosystem Dec 2025 – May 2026
Client: Global Assist Pte. Ltd., Singapore (NDA) · React.js · Vue.js · Go · Node.js · Android

- Contributed to a large-scale enterprise Content Management System and Android APK ecosystem used for real-time ad and media broadcasting across digital display networks globally — integrating 500+ REST APIs.
- Built full-stack features across React.js/Vue.js frontends and Go/Node.js backends, including drag-and-drop content management, GIF/video support, a time-date-based content scheduling engine, and 4K file validation.
- Developed Android APK features including offline USB auto-exec, automatic update via USB insertion, and MAC-based device authentication across distributed display hardware.
- Integrated Weather/Traffic News APIs with auto-refresh caching, license expiry workflows, multi-user permission controls, and a simplified setup wizard for non-technical onboarding.

Swasthya-Vakil — Legal AI for Ayushman Bharat Beneficiaries 2026
AWS Bedrock · Transcribe · OpenSearch · Serverless · NLP

- Architected an AI-powered legal automation system protecting Ayushman Bharat beneficiaries from illegal medical treatment denials, with voice-activated complaint filing supporting local dialects via AWS Transcribe.
- Implemented automated risk scoring, escalation authority identification, and auto-drafted legal grievance notices referencing live NHA guidelines — entirely serverless on AWS Bedrock and OpenSearch.

AetherOps — Enterprise AI CRM Platform 2026
React.js · Next.js · Supabase SSR · Multi-Agent AI

- Built an enterprise-grade AI-driven CRM with a drag-and-drop, node-based flow automation engine enabling users to visually build and execute business logic without writing code.
- Engineered a dynamic metadata layer for custom database object provisioning from the UI, multi-agent orchestration, and a BI dashboard with custom charting secured via Supabase SSR RBAC.

Secora — AI-Powered Web Security Analyzer Oct 2025
OpenAI API · Node.js · Redis · Docker · Next.js · Render

- Full-stack platform using the OpenAI API to analyze website security, interpret risk patterns, and generate prioritized remediation recommendations — deployed via CI/CD on Render with Redis caching and Docker.

DeFreelance — Decentralized Freelancing Platform 2025
Solidity · React · Web3.js · TypeScript

- Blockchain-powered freelancing marketplace with Solidity smart contracts, crypto payment settlement, and MetaMask/Trust Wallet Web3 onboarding.

EDUCATION

Amity University Mumbai — Master of Computer Applications (MCA), Information Technology Aug 2023 – Jul 2025
University of Mumbai — B.Sc. Information Technology, CGPA: 9.86 / 10 Jun 2019 – Jul 2022

CERTIFICATIONS

- Google — Implement CI/CD Pipelines on Google Cloud (Jun 2026)
- Google — Prepare Data for ML APIs on Google Cloud (Dec 2025)
- freeCodeCamp — Data Analysis with Python (Jun 2025)
- Walmart Global Tech — Advanced Software Engineering Virtual Experience (Jul 2023)
- Cognizant & JPMorgan Chase — Agile Methodology Virtual Experience Program (Jul 2023)
